

International Course on Soils as archive for natural and cultural change

Alexander Makeev, Moscow State University, Faculty of Soil Science
Birgit Terhorst, University of Würzburg, Institute for Geography and Geology, Germany
Elizabeth Solleiro Rebolledo, UNAM, Institute of Geology, Mexico City
Bernhard Lucke, University of Erlangen-Nürnberg, Institute of Geography, Germany
Simon Meyer-Heintze, University of Würzburg, Institute for Geography and Geology, Germany

July 4th to 8th, 2018, in Würzburg/Germany

The course concentrates on Quaternary paleosols and related sediments. Soil forming processes as well as polypedogenesis are highlighted and related to geomorphodynamics, climate change, and (paleo-)environment. The course is based on a 2.5-days theoretical part, 1-day field excursion, and a microscopical session. Participants are instructed to learn the international state of knowledge, methods, and systematics. The course program includes a workshop on "Paleosols and climate change", Saturday, July 7th.

Deadline: March 15th, 2018

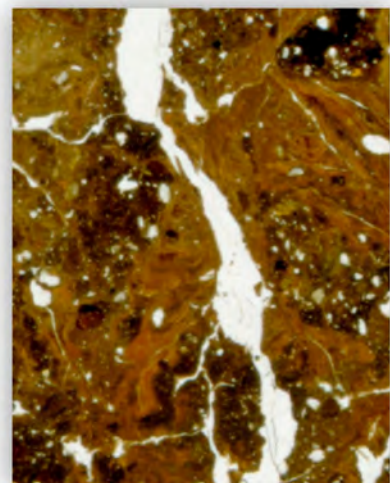

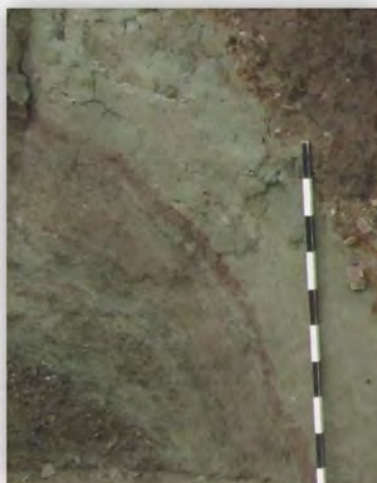

Registration fee for full course: 250.- € (accomodation not included)

Registration:
Simon Meyer-Heintze
